# QUSAI NATSHEH

**Odoo Developer | ERP Customization & Integration | Python | AI & Machine Learning**

Amman, Jordan | +962 77 893 5605 | qussayalnatsheh99@gmail.com

linkedin.com/in/qusai-natsheh-b65431417 | qusainatsheh.github.io | github.com/QusaiNatsheh

## SUMMARY

Odoo Developer at an Odoo Gold Partner, building and integrating Odoo for companies in Jordan and Saudi Arabia: accounting, payroll, e-invoicing (JoFotara), POS and CRM. Works across Odoo 16 to 20, including upgrades to Odoo 20. Builds machine-learning services around Odoo (bank reconciliation, journal entry anomaly detection, lead scoring, predictive maintenance) and measures each one against a baseline. Certified in machine learning (DeepLearning.AI) and generative AI engineering (IBM).

## SKILLS

**Odoo:** Odoo 16–20, ORM, QWeb, OWL, XML views, security and access rights, reports, module development, version upgrades, Odoo.sh

**Backend:** Python, PostgreSQL, FastAPI, Django, REST APIs

**AI & Machine Learning:** LightGBM, scikit-learn, PyTorch, generative AI, NLP, LLM evaluation, model calibration, anomaly detection

**Business domains:** Accounting, payroll, JoFotara e-invoicing, POS, CRM, inventory

**Frontend:** JavaScript, OWL, HTML, CSS

**Tools:** Git, GitHub, Docker, Linux

## EXPERIENCE

**Odoo Developer** 12/2025 – Present

*Smart Way Business Solutions (Odoo Gold Partner) | Amman, Jordan*

- Develop and customize Odoo modules for clients in Jordan and Saudi Arabia across accounting, payroll, POS and e-invoicing.
- Build Jordan-specific accounting features, including post-dated cheque management, journal entry posting controls and JoFotara e-invoicing rules for POS.
- Upgrade custom modules to Odoo 20 and support clients on Odoo 16, 17 and 18.
- Provide technical support and business process automation for client implementations.

## PROJECTS

**Smart Bank Reconciliation** | Odoo 19/20, Python, LightGBM, FastAPI

- Ranking model that suggests which customer invoices a bank statement line pays, with a confidence score and plain-language reasons.
- Handles partial payments, grouped payments and Arabic or English payer names; 96.6% top-1 accuracy vs 92.9% for a rule-based baseline (synthetic data).

Code: github.com/QusaiNatsheh/smart-bank-reconciliation

**Journal Entry Anomaly Detection** | Odoo 20, Python, scikit-learn, PyTorch

- Unsupervised ensemble (rarity score, Local Outlier Factor, autoencoder) that ranks posted journal entries for audit review, with a reviewer feedback queue.
- 71% precision in the top 50 flagged entries vs 58% for red-flag rules (synthetic data with injected anomalies).

Code: github.com/QusaiNatsheh/journal-anomaly-detection

**CRM Lead Scoring** | Odoo 20, Python, LightGBM, FastAPI

- Explainable, calibrated win probability for open opportunities, shown next to Odoo's built-in predictive lead scoring.
- Re-implemented Odoo's naive Bayes scoring in Python and matched Odoo's own score on all 123 demo leads.

Code: github.com/QusaiNatsheh/crm-lead-scoring

**Predictive Maintenance** | Odoo 20, Python, LightGBM

- Predicts engine failures from NASA turbofan sensor data and opens a preventive maintenance request in Odoo before failure.
- Remaining-life error (RMSE) of 13.1 cycles vs 36.7 for a fleet-average baseline; ROC-AUC 0.998 for 30-cycle failure risk.

Code: github.com/QusaiNatsheh/predictive-maintenance

**odoo-migrate-20** | Python, static analysis, CLI

- Command-line tool that reports what breaks when migrating custom modules from Odoo 19 to 20, applies safe fixes as a diff and turns the rest into developer tasks.
- Evaluated on 583 Odoo Community modules, using Odoo's own 20.0 code as ground truth.

Code: github.com/QusaiNatsheh/odoo-migrate-20

**Arabic Invoice Extraction Benchmark** | Python, OCR, LLM evaluation

- Repeatable benchmark of 100 Arabic and bilingual invoices (PDFs and phone photos) to compare AI models on accuracy, cost and speed.

Code: github.com/QusaiNatsheh/arabic-invoice-benchmark

**Smart Spend** | Django 6, Python, Gemini, Ollama

- Personal finance web app with budgets, month-end forecast, unusual-expense alerts and subscription detection; optional AI expense entry from text or receipt photos.

Code: github.com/QusaiNatsheh/smart-spend

## CERTIFICATIONS

- **Supervised Machine Learning: Regression and Classification** — DeepLearning.AI, Stanford Online (Coursera), 06/2026 — Verify
- **IBM Generative AI Engineering Professional Certificate** — IBM (Coursera), 09/2025 — Verify
- **Full Stack Web Development** — Al Hussein Technical University (HTUx), 10/2025 — Verify

## EDUCATION

**Bachelor's degree, Information Technology and Computing (ITC)** 2026
*Arab Open University, Jordan Branch | Amman, Jordan*

## LANGUAGES

Arabic (native), English (professional working proficiency)
